1.7 The Effects of Foreclosure on Children's Educational Outcomes

Room: SHENANDOAH H

Symposium: The recent housing crisis has produced profound changes in the economic conditions of families and communities across the nation. This symposium presents three papers examining the effects of foreclosures on students, schools, and neighborhoods. The first paper uses data from three school districts experiencing record foreclosure rates: Pinellas, Florida; San Diego, California; and San Joaquin (Fresno), California. The second paper uses data from New York City, and the final paper uses data from Washington, D.C., New York City, and Baltimore. The geographic variation across the studies provides a unique opportunity to compare and contrast the results in different contexts to inform the policy debate on foreclosure intervention.

2.4 Promises and Perils of Educator Incentives: A Formative Evaluation of the Teacher Incentive Fund (TIF) Program in the Prince George's County

Room: POTOMAC E

Symposium: Compensation reforms have gained center-stage status among strategies aimed at improving human capital in schools. This growing role of alternative compensation structures is partly a result of the significant infusion of financial resources from the federal Teacher Incentive Fund (TIF), which supports efforts to develop performance-based compensation systems in high-need schools. This symposium will present findings from a formative evaluation of the Financial Incentive Rewards for Supervisors and Teachers (FIRST) initiative, a TIF-funded program in the Prince George’s County Public Schools (PGCPS).

Chair: DONNA MUNCEY, Prince George's County Public Schools

Participants: JENNIFER KING RICE, BETTY MALEN, PAUL BAUMANN, ELKE CHEN, AMY DOUGHERTY, LAURA HYDE, CARA JACKSON, REUBEN JACOBSON, and CLARISSA MCKITHEN, University of Maryland;

Discussants: WILLIAM R. HITE, Superintendent Prince George’s County Public Schools, and LEWIS ROBINSON, Executive Director, Prince Georges County Educators' Association.

Discussant: CORRINE TAYLOR, Wellesley College, DAVID SIMS, Brigham Young University, and ROBERT BIFULCO, Syracuse University.
### 3.3 Charter School Management Organizations: Balancing Mission, Quality and Scale

**Room:** JAMES RIVER A

**Symposium:** Many charter schools are being opened by not-for-profit organizations, such as charter management organizations, or for-profit organizations, such as educational management organizations or networks. In this symposium, representatives from three organizations - Aspire (a not-for-profit charter management organization), Knowledge Is Power Program (a national network of public schools, largely, but not exclusively charter schools), and Green Dot (an educational management organization) - discuss the work underway to dramatically improve teaching and learning in some of the most challenging educational contexts within the country. Each of these organizations has at its core a commitment to addressing the schooling needs of students who live in underserved communities, seeking to achieve dramatic gains in student learning and achievement, culminating with high school graduates ready to succeed in college. And while there are similarities in the missions, each operates its schools in a distinct manner.

**Chair:** DONNA MUNCEY, Prince George's County Public Schools,

**Moderator:** DON SHALVEY, Bill and Melinda Gates Foundation.

### 3.4 Assessing Success in New Jersey's School Finance Litigation

**Room:** JAMES RIVER B

**Symposium:** Court decisions such as *Abbott v. Burke* in New Jersey mandated the shift of billions of dollars from upper and middle class districts into economically disadvantaged districts. What results are being obtained for redistribution of billions of dollars into poverty stricken districts?

**Participants:**

- MARGARET GOERTZ, University of Pennsylvania
- ALRED LINDSETH, Sutherland, Asbill & Brennan
- ALEXANDRA RESCH, Mathematica Policy Research
- STEPHEN CORNMAN, Columbia University, Teachers College

**Discussant:** MICHAEL REBELL, Columbia University, and DAVID C. LONG, Esq.

Discussant:  LUCIANA DAR, University of California, Riverside, JASON GRISSOM, University of Missouri, and DOUGLAS N. HARRIS, University of Wisconsin

3.6  Findings from a Comprehensive Evaluation of Denver’s "ProComp" Teacher Compensation Reform

Room:  POTOMAC G

Symposium:  Few teacher compensation reforms have been as ambitious as Denver’s Professional Compensation System for Teachers (“ProComp”). Based on the ProComp Five-Year Comprehensive Evaluation, this symposium will discuss the progress of ProComp towards its primary goals: raising student achievement and improving teacher quality. Four papers will be presented in this session: (1) an overview paper in which survey results about teachers’ beliefs about and practices under ProComp are analyzed; (2) a paper cataloguing achievement gains to date that appear associated with ProComp; (3) an analysis of the “Exceeds Expectations” element of ProComp which rewards teachers for above-average student achievement gains; and (4) an analysis of the “Hard-to-Serve” element of ProComp which rewards teachers for working in high-poverty schools. This symposium should appeal to those interested specifically in teacher compensation and more broadly in urban educational reform.

Participants:

EDWARD W. WILEY, University of Colorado at Boulder

AMY N. SUBERT, University of Colorado at Boulder

ELEANOR R. SPINDLER, University of Colorado at Boulder

5.6 The Financial Health, Financial Management and Financial Capacity of Charter Schools in the United States

**Room:** SHENANDOAH J

**Symposium:** Relatively little is known about charter school finances. This symposium includes four independent studies, each of which investigates a different aspect of charter school finance. The first paper investigates the financial health of charter schools; the second examines trends in the financial capacity of charter schools; the third analyzes the experience level, training process, and performance of charter school financial managers in New York State; and the fourth develops a framework for making charter school revenues and expenditure levels comparable to district schools, then it applies the framework to data drawn from New Jersey.

**Chair and Discussant:** ROBERT BIFULCO, Syracuse University

**Participants:** CYNTHIA SEARCY, Georgia State University; BRIAN O. BRENT, University of Rochester; LARRY MOLONEY, Aspire Consulting; LAWRENCE J. MILLER, Rutgers University

Discussant: WILLIAM J. FOWLER, George Mason University, and F. HOWARD NELSON, American Federation of Teachers.

5.8 State Budget Shortfalls and School Spending

Room: JAMES RIVER B

Symposium: Over the last twenty years school finance has been increasingly provided by state governments. This potentially leaves school districts more vulnerable to budget cuts during economic downturns. The current downturn may be especially difficult for schools due to the declines of both state and local funding sources and the extent of the recession. In this symposium we will have a discussion among representatives of state and local governments about how the economic crisis is affecting school budgets and services. How are schools coping? What role have stimulus funds played in protecting services? What are expectations in years to come?

6.4  Four School Districts and the Bill and Melinda Gates Foundation Create an Intensive Partnership to Empower Effective Teachers?

Room: POTOMAC G

Symposium: In spring 2009, as part of a new College-Ready grant-making strategy, the Bill and Melinda Gates Foundation (BMGF) invited nine school districts and a consortium of charter school providers to respond to a Request For Proposals intended to produce dramatically improved student achievement through an emphasis on building and rewarding teaching effectiveness. This symposium will bring together school district staff from the sites that received grant awards. Short presentations by the school districts will provide an overview of the plans and early implementation. Participants also will share perspectives on the common research agenda regarding measures of teacher effectiveness and policies and practices that support the development of effective teachers and their strategic placement in areas of greatest need. There will be ample time for audience participation through both question and answer and general discussion.

6.8 The State of Education Finance Policy

Room: JAMES RIVER B

Symposium: Each year, Education Week's long-running Quality Counts report examines a set of state education finance indicators. Based on an original data analysis, those measures capture patterns of school spending across the states as well as financial equity within states. On occasion the report has also taken a closer look at issues of school finance as part of its special topical theme. As a part of the larger project that produced the 2009 edition of Quality Counts, the Editorial Projects in Education Research Center conducted a special supplementary study to assess the state of education finance policy in America's schools. As it has throughout its 13-year history, Quality Counts tracks state policies across major areas of K-12 education. But in its most recent annual policy survey, the EPE Research Center also asked states to provide detailed information on a wide range of school finance policies and practices. In a new report, the Center presents the results of these survey data as well as expanded findings from its annual spending and equity analysis as initially reported in Quality Counts 2009.

### 7.4 Performance Incentive/Pay System Design & Implementation: Lessons from Formative Evaluation & Technical Assistance

**Room:** JAMES RIVER B  
**Symposium:** This session focuses on the nuts and bolts of designing and implementing incentive compensation plans for K-12 educators. The papers address specific teacher and/or principal compensation initiatives that have been in operation for at least one year. They describe how the program designs were implemented, the common problems faced in implementation, and the innovative solutions program administrators and technical assistance providers developed to respond. The programs to be covered include the Denver Professional Compensation for Teachers program, the State of Texas Educator Excellence Grant and Governor’s Educator Excellence Grant programs, and five of the U.S. Dept. of Education’s Teacher Incentive Fund grantees.

7.8  School Leadership: How principal training impacts student achievement

**Room:** POTOMAC G

**Symposium:** While teachers have the most influence on student performance, principals are essential for setting the tone of the learning community and modeling good teaching practice. Additionally, the principal is crucial to promoting and supporting teachers’ achievements, creating a positive work environment for teachers, and improving staff morale, which also creates the right learning environment for students that shapes the outcomes of a school’s performance. The three papers in this session examine aspects of principal training that may contribute to improved student achievement.
